

TOWN HALL

"Bob" Bair, is studios fellow and spends much of his time studying fire fighting. His latest work is the preparing a Fire Prevention Code for Belle Glade to be used in connection with the present Building and Electrical Inspection codes now in force here. He is of the opinion that these three codes fully enforced might bring about a lower fire insurance rate revision for the city, as much as 25 per cent, and a revised and better classification.

City water works chemists doing their best to get the excess coloration units out of the water. Some progress being made but still it remains an amber color. Water experts here on the job are as puzzled over the peculiar coloration, as were the local operators.

Off On Fishing Trip

Allen Carver and J. T. Lauch, employees at the City Water plant, are now off on a vacation trip, which they spent in and around Valdez, Cal., with considerable fishing on the program.

Opens Business At Old Laundry Stand

Mr. and Mrs. Marshall Smith, and family, of Baltimore, Maryland, have arrived in Belle Glade to make their home, and to engage in business here. Mr. Smith, who has been in the laundry and dry cleaning business in Baltimore, and who has seen the climate change on account of his physical condition.

He has leased the former Warren building from Michael, the tailor, and has equipped same with necessary machinery and will open the Star Laundry and Dry Cleaning plant this coming Saturday, July 26th.

Hospital To Hold Open House On 6th With Public Invited

Mrs. Ruth Wedgworth is announcing the holding of an open house for the local hospital which will be officiated with the Western Palm Beach Hospital District on Friday under a lease from the city. It is expected that the hospital will be decided to the district in the very near future.

The Board of Directors of the hospital district are making preparation to operate the local hospital with Dr. W. J. Buck, Chief of Medical Staff; Mrs. Amy Whidden, Director of the two hospitals, and Mrs. former manager will be retained in an advisory capacity for some time.

The estimated replacement cost of half million dollars for the plant, includes about half that amount in value of equipment.

All government sponsored hospitalization and clinical treatment of occupants of the Migratory labor camps will continue on the 24th day of July. Whatever such treatment is accorded will be under new arrangements to be made.

Dr. D. L. Stoddard Reports To Station

Early in July Dr. David L. Stoddard reported for duty as Associate Plant Pathologist at the Everglades Experiment Station in which position he will give considerable amount of attention to the study of virus diseases and their control. The importance of this group of plant diseases is well illustrated by the great amount of damage done by citrus mosaic in the past few years in the Lake area, and by pepper and squash mosaic on those crops in the western end areas of the Everglades in Martin, Broward and Palm Beach Counties.

Dr. Stoddard is a native of Maryland and recently received his doctor's degree from the State University after having spent two years as an Assistant Plant Pathologist at the Federal Experiment Station located in Mayaguez, Puerto Rico, and a year of graduate work at North Carolina State College, Raleigh.

Local Teacher Seeks Leave Of Absence

The County Board of Public Instruction has decided to make additions to the Lake Harbor school by three rooms, and C. C. Garrett has been awarded the contract for the construction work, which is to be completed by opening of school in September.

After long consideration and dickering the Board also agreed to purchase the Stagers property in Pahokee to be added to the present school site holdings, the payments to cover four years.

Mrs. Ida Hardy long active in the Belle Glade school, has been absent from her duties here. Miss Lennie S. Clark has been elected to a position in the Belle Glade schools.

The new principal for the colored Everglades at Pahokee, is Britton G. Sayles.

County Clinics Have Been Set Up In Glades Area

Clinic dates and places are being set up over the county by Dr. W. E. VanLandingham, county physician. The Dr. VanLandingham states that they are being set up with the purpose of making the Glades area as to the probability of any need.

Clinics have been established in Delray, once weekly, West Palm Beach three times weekly, serving Lake Worth and all communities immediately west and north of West Palm Beach. The setting up of these clinics is of the utmost importance to the county due to the fact that it is better to give protection to those who will accept it than to wait until an emergency arises.

Dr. VanLandingham states that he hopes to be at the different clinics in the Belle Glade and Pahokee areas at the following times: Belle Glade Migratory Hospital each Thursday from 10 to 12 A. M., The Charter Memorial Clinic each Thursday from 1 to 2:30 P. M., and the Pahokee Hospital each Thursday from 3 to 5 P. M.

During these hours immunizations for typhoid will also be given for the present time. Dr. VanLandingham hopes to be able to make himself available for consultation with the needy sick who may see him during the above hours or refer to him by local physicians relative to specialized surgical or medical service and hospitalization will be given attention.

With the work of a Social Service Investigator every Tuesday, Dr. VanLandingham will be in service in addition to the plan outlined for every Thursday. All matters which may be brought up before the clinic, due to the discontinuance of the Migratory clinics, may be taken care of.

Lions Hotard And Lively Accept Lion Club Offices

Owing to the growth of work in the recent keeping of the club, Emmett Roberts, president of the Lion's club, has announced a change in two important offices, in the appointment of R. E. Hotard, as secretary, and Ed. L. Lively, as treasurer.

H. H. Pugh, having resigned the combined offices of secretary-treasurer, owing to his removal from the city, brought about this action of the Board of Directors.

Chairman Dickinson, of the Lion's Educational committee, conducted an impressive initiation ceremony in receiving Ted Pope, Lonnie Warren, Willam Horn, James Waddell and Clyde Graves into club membership.

As the present flood and drainage program are vital to Belle Glade, the club passed a resolution endorsing the Chamber of Commerce in the Port of Last Sunday, as well as the work being done by the Civic committee in suggesting lines of social editorial, copied to be sent to our Congressmen, and the Governor of Florida.

AIR POWER

AIR FORCE

IS PEACE POWER

HELP BUILD

AMERICA'S AIR POWER

on AIR FORCE DAY, AUGUST 1ST

No one today questions the fact that the whole future of the United States may rest in the very clouds over your head. And the new, reorganized Air Force gives thousands of eligible young men an opportunity to take an active part in building America's air power... on the ground as well as in the sky.

You may, for example, enlist in the Air Forces for three years. If you have a specialty which will qualify you, you may also be able to enlist in a grade at higher pay.

If you had Air Forces experience, you may join the Air Reserve and continue your military aviation training outside of business hours.

Or, you may join the Air National Guard and perhaps become a pilot for advanced technical training at special Air National Guard schools.

On Air Force Day, make a point of finding out everything about your Air Forces - especially the new Aviation Career Plan described below. Full details can be obtained at your U. S. Army Recruiting Station.

NOW - THE WORLD'S GREATEST OPPORTUNITY FOR A CAREER IN AVIATION

Today the Army Air Forces offer high school graduates an unprecedented opportunity to get the finest aviation schooling on earth - and select your school or course before you enlist.

The AAF Career Plan is unlike anything ever offered before. It permits selected high school graduates to apply and qualify for AAF specialized courses of their own choice. Simply go to the kind of aviation training you want and he will provide you with an application blank and a complete list of available courses.

When you are selected to attend the course of your choice, you enlist in the Army Air Forces for 3, 4 or 5 years. After your basic training period you are guaranteed that education you have selected to make you a specialist in the type of work you want.

Get a list of all the schools and courses open to you under the AAF Aviation Career Plan at your U. S. Army Recruiting Station.

Pakokee Desires Control Of Three Migratory Camps

Following the action of Belle Glade and South Bay, Pakokee has swung in with the organ-

ization of a Housing Authority composed of L. L. Stuckey, Robert Chamberlain, Claude Shirley, Joe E. Waddell and Albert Freund, constituting its trustee board. The City Com- mission set up the legislation for the Authority, and Mayor

Thomas Richardson picked the members of the board. The Authority will ask the Government to turn over the three migratory camps at Pa- kokee and Sand Cut for future operations, under the provisions

of an act pending in Congress, permitting the Department of Agriculture to make such trans- fer, when and if it gives up operating control.

The six year operation of all camps and the Migratory hos- pital at Belle Glade have proven the need for agricultural needs. Their continuation is of

imperative importance to the region. Medals to Naval Veterans of World War No. II. If you are entitled to either or both of these medals, and if you live in this community, the Navy Department will inform you by letter and you may obtain them by contacting Jack O. Johnson at 140 Ave. A, Belle Glade, Florida.

A Word Of Appreciation

Having been given a promotion to the Superintendent's staff of the Gulf Life Insurance Company, which I have represented in the Glades area for four years past, I will soon be leaving the territory.

I desire to thank all those who have given me their insurance, making it possible to receive the above announced promotion and a wider field for my specialty activity. Your support has been phenomenal and has been fully appreciated by the Gulf Corporation and myself. I desire to express the hope that citizens will continue to extend to my successor in the field the same kind of patronage they have extended to me.

OBSERVATIONS

(Continued From Page 1)
tained the Lion's club, in a talk on the "Lincoln Penny," which have had several issues of various designs and markings. President Theodore Roosevelt, authorized the Treasury department, to strike a coin commemorating the 100th birthday of the noted Emancipator back in 1909. The first issue was for 25,000,000 coins, and all had the profile of Lincoln on the head side of the coin. The mints at Philadelphia, Denver and San Francisco were the ones who minted the coins, all of different markings. It was President Roosevelt who directed that the words "In God We Trust" be stamped on the head side of the coin. The Lincoln head is claimed to be the finest etching appearing on any of Uncle Sam's coins, and was the first symbol that has ever appeared on a coin outside those designed by Government employees. A complete set of Lincoln coins costs from \$150 to \$200 on the coin market, and cannot be purchased from the mints, but can be secured through the Treasury Department.

The Ohio Legislature by recent act has finally taken the quail or common "Bob White" out of the song bird classification and goes out of the protected class. What have those nimrods of Ohio will play on this very popular game bird.

Have you ever noticed that pile of aluminum pipe across from the Insecticide Corporation's plant? Well that is a California product. While in the west on a recent visit W. P. Risk made a visit to the producing plant, and saw the method of making such pipe. A large block of the metal is placed in a position, and by a drawing out process, the pipe is made into desired lengths, is being practically a one operation job. Two years ago, in war time, a consignment of such pipe from California to Belle Glade, by rail cost around \$2,000 in freight. This year, a similar shipment, handled part water and part rail, cost about 54 percent of the former bill.

Some times it takes getting behind an eight ball, before a person really gets next to the fact that all is not right with this method of operation. When that fact gets a firm brain lodgement then there is going to be some revisions to again get out of the corner, into sounder and more favorable operations. Many producing farmers in the Belle Glade area have long known that changes in operation were due for them, if they expected to keep on in the winter vegetable and other farm activities, for a profit showing on the ledger pages. The forming of the new Belle Glade Farmer's Co-Operative last week, is a forward movement which those who propose to enter as producing members, feel is a protective measure that may mean much to the participants. With the tentative acreage available, and the variety of produce grown, along with customer business, a modern packing house, and precooling plant would be able to operate the entire season. This movement seems to be a sound business movement.

When the new City Directory of Belle Glade is issued by the Chamber of Commerce.

it will only list the permanent white and black citizens of the town, and not the floating negro population which comes in for a cropping season. The listing of the latter would be of no great apparent value to such a publication, but, for permanent citizens, businessmen and residents, of great value.

Those Dade county farmers are anxious to get a travel outlet out of that section, which would lead into the Glades area and then on up the trucking line, and have been putting pressure on for such a road. Looks as if their efforts would be successful. The one desire is to get a route that would miss the big cities, and the central route as proposed, would meet that desire. Quite a stretch of the proposed connecting road would be constructed in Palm Beach county, tying in with Road 25 and the Lauderdale road, or with the Range line road to Road 80, or one cutting across to Okeelanta.

Had an opportunity of riding over the new Range line highway from Pompano north to Road 80. Found a very fine highway and was amazed at the farm development going on all up the route. Small but pretty homes, improved and drained acreage, and real signs of prosperity. Should all those pesky hyacinths be removed from the present choked canals, better drainage would result, and there would be a long stretch of fine fishing waters in addition. Some day that section promises to be a real rival to the Glades produce area. Some Glades farmers we understand already have land holdings over there and are preparing or are already farming them successfully.

Lots of northern people these summer days are having "drop in" visitations of an unexpected nature, from their "southern" cousins just like we get the snow bird visitations in our winter season. Even exchange is no robbery type of incident.

A woman addressing the city commission concerning the high grass and weeds, and the attendant mosquitoes, stated that she thought the grasses grew about seven times as quick and prolific down here than any place on earth. One who owns a sizeable lawn, and keeps it up in good condition, at the end of the month, finds that the cost has somewhat flattened the family pocketbook.

The members of the Belle Glade Volunteer Fire department are a versatile and handy bunch of workmen, and they are now pooling their abilities to raise funds to strengthen their company exchequer. They are now checking and refilling a number of the fire extinguisher machines found in stores and the parking houses, as well as those in the city properties. Just drop in and see Assistant Chief Bair and he will tell you the entire list of projects of repair they can handle. Give the fire ladies a little financial aid with your work.

Observation and Comment
Have heard of saucers being thrown through the air in the past, but not in the purpose of the imaginative or real saucers that have been claimed to have been seen in the skies of recent date.

Churches of Christ, Scientist
"LOVE" is the subject of the Lesson-Sermon which will be read in Churches of Christ, Scientist, throughout the world on Sunday, August 3.

The Golden Text is "Let him that glorify in glory in this, that he understandeth and knoweth me, that I am the Lord which exercise lovingkindness, judgments, and righteousness, in the earth" (Jeremiah 9:24).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "I will feed my flock, and I will cause them to lie down, saith the Lord God. . . . Thus shall they know that I the Lord their God am with them, and that they, even the house of Israel, are my people, saith the Lord God (Ezekiel 34:15-20).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to Scriptures," by Mary Baker Eddy: "Not materiality but spiritually we know Him as divine Mind, as Life, Truth, and Love. We shall obey and adore in proportion as we apprehend the divine nature and love Him understandingly, waiting no more over the co-operability, but rejoicing in the affluence of our God" (186:7-12). 8-1-47

LAKE FISHING IS REPORTED GOOD

Right here at our back door is one of the finest bass fishing waters in the world. Yet, how few of our citizens take time to learn how to fish for those game bronze backs? No past time so fascinating, especially when you get hold of a fighting whopper.

Got to Have Equipment?

But before you can catch fish of any kind you must have the equipment, and get the hang of handling the outfit, and know the haunts of the water denizens.

Our sporting goods department is now about on a par to the high pre-war standard and we can supply you with most equipment, for hunting and fishing.

RODS BAITS

Ocean City Searods, Lines, Eger, Hedden, Creek Clubs, Reels, and Casting Rods. Jiggs Bay Pork Rind Baits, a large assortment.

Have you seen that new named Shakespeare SPUN GLASS Casting Rod? The slickest piece of fishing equipment that has hit the market.

We also have plenty of ammunition on hand for your hunting uses, Peters and Remington loaded shells.

A Statement To Our Customers About Resale

PRICES of PRODUCTS

Built by International Harvester Company

Here at Harvester we are concerned over the fact that a growing number of our products are appearing on the resale market at greatly inflated prices.

As manufacturers, we try to produce at the lowest possible cost. We cannot set the prices at which our products—tractors, motor trucks, farm implements, refrigeration, and industrial power equipment—are sold. We can and do suggest list prices which the great majority of our dealers adopt as their retail prices.

\$20,000,000 Price Reduction
Our basic price policy was publicly stated in March, 1947, when we announced price reductions at the rate of approximately \$20,000,000 per year on our products. At that time, Fowler McCormick, Chairman of the Board, said: "ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED."

Practically all of our dealers cooperated with this policy and passed on the savings to their customers. The objective of the price reductions was to make it possible for customers to buy our products, which they need so badly, at lower prices. Naturally, this purpose is defeated when our products are sold by anybody at inflated prices.

IH Production at All-Time Peak

Inflated prices are caused by

the difference between supply and demand. To increase supply, we now have the greatest number of employees in history on our payrolls—almost 90,000 in the United States, as against about 40,000 previous. Large new plants are getting into production in Louisville, Evansville, and Melrose Park. A fourth will soon be in operation in Memphis. The men and women now employed are turning out the greatest quantities of IH products of all kinds that we have ever made. These are also the finest products we have ever made, and recognition of that fact is an important contributing factor to the demand for them.

Distribution to Dealers

But even record-breaking production is not sufficient to give our dealer—and other IH dealers—enough products to meet today's demand. We have tried to make the fairest possible geographical allocation of our products so that every dealer would get a fair share, and we know that dealers, in most cases, have tried earnestly to make the fairest possible distribution to their customers.

But we also know that many of our products—far too many—are being resold at inflated prices. The public criticism and resentment of these resales are of real concern to us, as we know they must be to our dealers, because such reactions en-

danger the good will of both the dealer and the Company in any community.

Distribution to Customers

Experience shows that many IH new products are being resold by users who decide they can continue to make out with their old equipment after they have had an inflated offer for their new equipment. To eliminate this, many dealers are taking measures to be sure that equipment purchased is for their customers' own use and is not to be resold.

Nearly all IH dealers, we believe, are now using the basis of PRESENT NEED as their primary guide for the sale of scarce products. The customer whose need is real and urgent is not likely to resell.

What Price Should You Pay?

While it may take a little more time to get delivery, we urge our customers to consider all of the factors mentioned here, before paying more than the list price for any IH product. Any IH dealer or branch can furnish the suggested list price for any IH product.

We know that the overwhelming majority of IH dealers are as much opposed to inflated prices as we are. In the public interest, we have already asked their cooperation and are now asking the cooperation of customers—in the operation of customers—in correcting this situation.

The Veterans Corner

(A public service feature of the BELLE GLADE HERALD in cooperation with the U. S. Veterans Administration Contact Office, 712 Coleman Building, West Palm Beach, Florida.)

Answers to the 10 questions that veterans ask most frequently about hospitalization at Government expense were reported today by the Veterans Administration. The questions and answers follow:

Q. Which veterans are entitled to hospitalization in a VA hospital?

A. Veterans with service-connected disabilities have top priority for VA hospital care. Veterans with non-service-connected ailments may be hospitalized if beds are available and if they say they cannot afford treatment elsewhere.

Q. How and where do I apply for hospitalization?

A. See your nearest VA contact representative or apply at a VA regional office or hospital. In an emergency, call the nearest VA office, collect.

Q. Do I have to pay anything for VA hospitalization?

A. No. All charges are borne by the Government.

Q. Can I go to a private hospital in my home town and have VA pay the bill?

A. Yes, if you have a service-connected disability and receive VA's approval first.

Q. What papers should I bring with me when I apply for VA hospitalization?

A. Bring your honorable discharge certificate or a certificate of release from the military service.

Q. Will VA pay for the medical care of my dependents?

A. No. Only veterans are eligible for VA hospital care. Q. Do I have a choice as to which hospital I will go to?

A. Generally, a veteran is assigned to the hospital nearest his home. However, crowded conditions in certain hospitals, or the type of injury or disease suffered by the veteran might result in his being assigned to a special center or hospital in another section of the country.

Q. Can my relatives visit me while I am in the hospital?

A. Yes. All VA hospitals have special visiting hours each day for visitors, the same as civilian hospitals.

Q. Will my disability compensation be taken away from me if I am hospitalized in a VA hospital?

A. If you are single, your compensation will be paid to you in full every month for the first six months; but, if your treatment or care extends beyond six months, your monthly benefit payment may not exceed 50 percent of the regular rate, or \$30 per month, whichever is the greater. If the regular rate is \$30 or less, it will not be reduced.

Upon discharge by VA, you will receive a lump sum equal to the amount that was withheld after the sixth month.

If you have a dependent or dependents, your compensation payments will continue at the full rate for the entire period of your hospitalization.

Solly Corbin, bridge tender at the government dam, has held that position for the past eight years, and states that while he has the water in the cross-stake canal, especially in the boat basin, been as high as at the present time, those dates being back in 1939-40. Even with the high water the camp is still high and dry and in no immediate danger of inundation.

Corbin is now the sole owner and operator of the fishing camp and docks, as he recently purchased the interests in the buildings and equipment of Captain Restor, who has gone to Gilchrist Co., where he is setting himself up in a large poultry business.

Corbin states that fishing patronage from his dock has been exceedingly good the past few weeks, and despite high lake water, fishermen have been bringing in fine strings of black bass, many of them in the high poundage class. Owing to the dry condition and the swift waters on the canal proper there are few fish present, and the lake must be sought to get good fishing returns.

The week end business has been lively, and the sportsman coming have registered from all over the United States, and most of them have gone away highly pleased with the fishing on the big lake.

Fred Corbin, of Dolan, Ala., is associated with his brother in the camp activities. A campitory has been established at "C" camp.

School Budget Is Presented For Approval
Dr. John I. Leonard, head of the Palm Beach County schools, the past weekend was in Tallahassee, where he presented to the State Board of Public Instruction, the budget for the coming school year.

Dr. Leonard states that this is the largest budget ever presented by the county, and one of the largest in the state, and that it provided for an increase of \$78,000 for teachers salaries alone.

He also stated that he was highly pleased that so many of the teachers already employed in the school system faculty work, had attended summer schools, in endeavor to build up their scholastic standing, which will add to their salaries. Teacher requirements will be much higher than in the past, and it will be somewhat more difficult to secure teacher appointments.

Masonic Club Meets And Plans For Work
The Pastmaster and Warden of the Association of the 22nd, Masonic district held its meeting at the hall of Gulf Stream Lodge in Lake Worth July 18th, with Joe Cherry, of Belle Glade, its president, presiding. Around 35 of the past officers were present, and there was much interest shown in the new organization. A constitution and By-Laws were drawn up and plans made for future ac-

activities. The Association plans to get out a monthly bulletin, or letter, setting out activities of the 11 lodges of the district. The next meeting will be held at Boynton Lodge the third Friday in August.

Belle Glade lodge welcomed a large number of visiting brothers at its last session, at which time several candidates were recipients of the Entered Apprentices degree work.

Enjoy Deep Sea Fishing Trip Off Everglades City

A group of local young men went down to Everglades City, and went deep sea fishing off that port. The boys had a successful day at angling and brought home a nice collection of snook, redfish and amber jacks. Those forming the party were: Walker Fears, Joe Murphy, Roney Parrish, Elmer Williams, Wilbur and Elmer Kirkman.

44 ways To get "Something for Nothing"

The railroads have received 44 "rules" demands from the leaders of the operating unions... representing engineers, firemen, conductors, trainmen and switchmen. They say they are seeking only changes in working conditions—not a wage increase.

More Money For Less Work
But what kind of rules are being asked for? Twenty-eight of them would compel railroads to pay more money for the same, or less work; 7 would require additional and unnecessary men to do the same work; the rest would bring about changes in operating practices at increased cost.

For Instance:
The Union leaders demand additional train and engine crews on Diesel-powered trains—one full crew for every power unit in the locomotive. A freight train hauled by a 4-unit Diesel would have to carry 4 engines, 4 firemen, 4 conductors, and at least 8 brakemen, or a total of 20 men instead of 6.

"Made Work"—Sheer Waste
The Union leaders demand that full-length freight trains be cut to about half their length, even though freight trains are most efficient for low-cost service to you. This rule would cost twice as many locomotives, would double the number of trains, and make sections more likely.

Additional equipment, yards, and other facilities required to take care of these short trains would cost hundreds of millions. What the Union leaders really want is to make more jobs.

The Union leaders demand that when a crew in one class of service perform incidental service of another class, they will be paid not less than a day's pay for each class, even though all service is performed as a part of the same day's work.

The crew would get at least two dollars for one day's work.

The Union leaders demand that the present day pay for passenger conductors and trainmen be reduced from 150 to 100 miles, which would have the effect of increasing their pay 50%. Such a run often takes only two or three hours.

You Can't Afford This Waste
Demands like these are against the interests of the whole American people, who depend on railroad service for nearly everything they eat, wear and use.

These rules would cost a BILLION DOLLARS annually—a gigantic waste which neither the railroads nor the country can afford.

Railroad workers are good citizens and good employees, with pride in their calling. Their record during the war was outstanding. We do not believe they fully understand the "fastened" rules which the Union leaders are demanding. We do not believe they understand the harmful results which these rules would have to the railroad industry, to the millions of men and women dependent on railroads for their livelihood, and to the shipping and consuming public.

The great strength of America is in production—an honest day's work for an honest day's pay.

For only through greater production can we hope to stop the steady upward surge of living costs.

Surely, if ever there was a time in our history when we needed to work; not waste, this is it.

We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

Before the Lion's club, Lister Jones, gave a very comprehensive talk in which he set up the organization of the National County and District units, and how they were prepared to serve in case of storm or flood emergency work. He stated that owing to improved methods of training and reporting approaching storms, far superior information would be available, giving plenty of time for evacuation if the local committee deemed it advisable. He also stated that this local committee was most important, for it had complete control of activities, backed by the National Red Cross Society. That every precaution for meeting storm and had been arranged, and that if people would but follow its instructions during storm periods, that they would be better off, than trusting to their own judgment.

Record Shipment Of Ramie Out Of Glades For Foreign Consignee

Five solid carloads of ramie fibre, the largest single shipment in the history of the United States, were recently loaded on the Florida East Coast Railway at Canal Point, Fla., for export to Switzerland. The record shipment was made by Newport Industries, Inc., and represents one cutting from only 300 acres.

Ramie, which produces a fibre having many times the tensile strength and toughness of cotton, promises to become an important new Florida product and industry. Approximately 2,800 acres are in the United States where it is being grown on a commercial scale. Two plants for the processing of ramie, an operation mechanically separating the fibre from the pulp of the stalk, have recently been opened in the Florida Glades area, one at Canal Point and the other at Belle Glade.

The principal commercial uses of ramie fibre are for making naval gunpowder shales, high pressure hose fabric, fish nets, cloth, shirtings and for the making of high grade paper such as cigarette paper. It has a present market value of around 30 cents per pound, less than cotton, although the fibre must be further degummed before it is ready for spinning.
